

GLASS DIGITAL PRINTING

HIGH RESOLUTION IMAGES ON GLASS

Any photographic image or geometric design can be applied inside laminated glass.

CMYK GRADIENTS

We can print any type of shade in any color by applying the desired level of transparency.

WHITE GRADIENTS

The white shades have always been appreciated by architects for their lightness, elegance and durability of design over time.

PHOTOGRAPHIC IMAGES

We can print any photo with the desired transparency level. Special interlayer can be used as a background to achieve maximum opacity.

PATTERNS

Patterns are the most appreciated graphic elements by interior designers. We can reproduce any color or white pattern with any level of opacity.

Glass	All types of glass / All thicknesses
Interlayer	Minimum thickness 1.52 mm
